## PROFILE

---

Software Engineer with 2 years of hands-on apprenticeship experience in full-stack development, backend/API engineering and technical documentation in enterprise environments. Currently working at Dassault Systèmes on systems related to legal entity management and API documentation for partner reseller ecosystems. Comfortable with Python, JavaScript/TypeScript, Java/Spring Boot, REST APIs, OpenAPI, CI/CD, Docker, Kubernetes and Linux. Looking for a permanent Software Engineer, Backend Developer, Full-Stack Developer or API Engineer role, preferably remote in France or based in the Paris / Île-de-France area.

## SKILLS

---

**Programming:** Python, JavaScript, TypeScript, Java, C++, SQL

**Backend & APIs:** REST APIs, OpenAPI / Swagger, Spring Boot, Node.js, microservices, API documentation, API standardization

**Frontend:** React, Vue.js, HTML/CSS, responsive interfaces

**DevOps & Tools:** Docker, Kubernetes, Git, Linux, CI/CD, Redocly, internal documentation / wiki systems

**Databases:** SQL, MongoDB

**Methods & Strengths:** Problem solving, technical analysis, API quality, maintainability, documentation automation, standardization, cross-functional collaboration

## PROFESSIONAL EXPERIENCE

---

### Dassault Systèmes — Apprentice Software Engineer

Vélizy-Villacoublay, France | Sep. 2024 – Sep. 2026

- Developed full-stack features for a legal entity management system connected to Dassault Systèmes environments.
- Designed and maintained OpenAPI documentation for APIs used by partner resellers.
- Analyzed API documentation and standardization tools to improve documentation quality and consistency.
- Implemented OpenAPI best practices with Redocly.
- Developed custom Redocly linting rules to enforce API documentation standards and reduce manual errors.
- Supervised CI/CD processes for online documentation publication when the supervisor was absent.
- Created and maintained internal wiki documentation to track, explain and share project progress.
- Worked in a complex enterprise context requiring reliability, compliance, clear documentation and collaboration with multiple stakeholders.

### DALINK Conseil — Apprentice Full-Stack Developer

Chatou, France | Sep. 2023 – Sep. 2024

- Installed and configured a Debian virtual machine for company needs.
- Fixed bugs and improved web application stability.
- Developed reporting tools to support internal data analysis.
- Created survey tools and contributed to application features.
- Worked with Linux, web technologies and backend/frontend development tasks.

## EDUCATION

---

**ESIEE-IT — Master's Degree in Software Engineering and Management Information Systems**

Pontoise, France | 2025 – Present

**IUT de Vélizy-Villacoublay — Computer Science Bachelor**

Vélizy-Villacoublay, France | 2021 – 2024

## LANGUAGES

---

- French: Native
- English: C1
- Spanish: Intermediate

## TARGET ROLES

---

Software Engineer, Backend Developer, Full-Stack Developer, API Engineer, Python Developer, JavaScript/TypeScript Developer, Java/Spring Boot Developer.

## PREFERRED LOCATION / CONTRACT

---

Permanent contract (CDI). Remote France or Paris / Île-de-France, especially Guyancourt, Vélizy-Villacoublay, Versailles, Saint-Quentin-en-Yvelines, La Défense and Paris.
